

## A high-cycle model ideal for fine precision molding in cleanrooms

### Features

#### Improved productivity

Achieved the super high takeout speed of 0.32 seconds with our uniquely-shaped lightweight aluminum frame and high power motor.

\*Dry cycle time as per our requirements

#### Energy saving

**PAT.**

Up to 29% reduction of air consumption by using ECO suction™ as part of the standard specifications.

\*Dry cycle as per our requirements

#### Conforms with clean specification standards

Conforms with ISO Class 6.

\*Regular maintenance is required to maintain the cleanliness level.

\*Our measurement result in accordance with ISO 14644-1.

#### E-touch™ II -S Controller

The 10.4" full-color touch panel improves visibility on a large screen for easy operation.

#### Conforms with international safety standards

Conforms with CE specifications. Improved safety and maintenance performance.

Molding machine interface	Euromap67
Safety category	Category3 PL= d
Conforming standards	EN ISO 12100 EN 60204 EN ISO 10218
